# John Pass

## 2022 COLLECTION

Dear All,

For the whole of my career at John Pass we have quite rightly remained focused on you, our loyal customer. This year we are proud to announce that we have now started to look after the future generations of your family by officially becoming a carbon neutral business, protecting the planet and helping to prevent climate change.

We are one of the first retail jewellers in the UK to stop talking about this important topic and actually make it happen. We have put in place a number of measures to ensure that we reduce the amount of carbon dioxide we create as an energy consuming business, from photovoltaic cells on our shop roofs through to even changing the brand of toilet paper we use, and naturally this catalogue is printed on 100% recycled paper! Furthermore we have engaged in philanthropic projects all around the world to offset the remaining carbon footprint that we inevitably create.

We are proud to continue our tradition to create long lasting special memories whilst shopping for that special gift at John Pass. We are now even more proud to do this in a sustainable way, creating those same special moments without leaving any footprints behind us and creating a more secure future for our future generations.

We will be proud to serve you soon.

Very best wishes

Andrew and The Team at John Pass.

# CHARLES GREEN

SINCE 1824

At Charles Green, we combine nearly 200 years of traditional craftsmanship with the latest in modern technology to provide you with an unrivalled service.

Charles Green offer a complete CAD design service including re-mounts, shaped-to-fit wedding rings and unique one-off pieces.

Our studio is fully equipped with 3D scanning, 3D printing technology and the latest CAD rendering tools to create high resolution images, all at competitive prices.

# CHARLES GREEN

SINCE 1824

Based in Birmingham's historic Jewellery Quarter, Charles Green is a family run company that formed in 1824. Today we manufacture the finest wedding rings, engagement rings and eternity rings as well as our popular lockets and bespoke products.

Due to improvements in technology, bespoke design is dramatically increasing in popularity and is now an affordable option for many customers. Our 3D render software allows our designers to create realistic images of your final product before you proceed. Once you are happy with your design we move to manufacture where we can 3D print your design which is then cast.

We can supply all precious metals including 18ct yellow gold and platinum. Once cast your piece is hallmarked and then hand mounted on a traditional jewellers bench. If required the piece is then set under micro-scopes to ensure the finest quality. The final process is polishing to bring your new piece to life.
